FOREWORD The aim of this publication is to provide the owners of Leyland P76's with spare parts information to ensure the prolonged life of our vehicles.

I hope that the members who have purchased this booklet find it of great use.

To ensure that this publication is kept up to date as either new spares appear and as new information on P76 parts becomes available please pass this information on to the SA P76 owners Club. This can be achieved via the following contact details

SA P76 Owners Club
C/o Brendan Jones
23 Brightman St.
Flagstaff Hill
SA 5159

or phone on (08) 270 2255

USER INFORMATION The format of this publication is such that it emulates the original Leyland P76 Parts Catalogue for the 4 door Saloon (with some additional sections).

The page structure is such that the left hand column gives the part description, the central column gives the original part number and the source of the information (eg. SA Mar. 87 says SA club March 1987 magazine), the right hand column gives equivalent replacement part details, interchangeability and possible source of the part.

Before using the information make sure there is no doubt that the given information is correct. For example double check part numbers and specifications with the supplier and compare the original part with the replacement.

By obtaining the referred to club magazine more information on the replacement part can often be obtained.

DISCLAIMER The information given in this publication is only a guideline, the use of any information given is entirely at the user's risk. The SA P76 Owners Club and the editor of this publication accept no responsibility for any consequence which may arise from the use of the given information.

THANK YOU Thank you to all local and interstate club members who have provided the information necessary to see the publication to this stage of completion.

SECTION 28

VARIATIONS BETWEEN P76 AND ROVER V8

The following comprises a list of parts which are not interchangeable between the P76 and Rover V8 engines.

Source of Information: P76 Training Manual for Leyland Dealers , March 1973. This version taken inturn from Westwords , February 1987 then Queensland ,June 1987.

- Block: Height increased by 0.94 inches (on P76); various minor casting changes. Rear main seal, the Rover seal is two piece.
- Sump and Baffle: Sump capacity and shape altered; baffle plate mounting altered.
- Oil Strainer: Similar in appearance; extra baffle added below strainer on P76.
- Engine Mounts: Shape completely revised.
- Crankshaft and thrust washers: Main bearing journals larger and stroke increased on P76. Thrust washers are a different shape.
- Spigot Bearing: Ball bearing on P76, bush on Rover.
- Crankshaft Pulley and damper: Damper and hub are seperate components on P76.
- Con Rods: Length increased on P76.
- Front cover and seal: Front cover revised, machining alterations in oil pump and water pump areas. Seal completely revised.
- Oil Pump: Housing ports revised, and internal components altered. Relief valve and oil filter bypass valve revised.
- Push Rods: Now tubular with spherical ball ends.
- Hydraulic Lifters: Visually similar but internal variations.
- Rocker Gear: Rover use shaft to mount rocker gear.
- Camshaft Gear: Visually similar but counterweight deleted on P76.
- Inlet Manifold: Completely revised in shape and casting; gasket and end seals also differ.
- Cylinder Head: Minor casting changes.
- Rocker Cover: Pressed metal cover on P76. Gasket has location tags on P76.
- Water Pump: Design completely revised. Pulley altered and fan revised.
- Exhaust Manifold: Incorporates automatic choke on P76.
